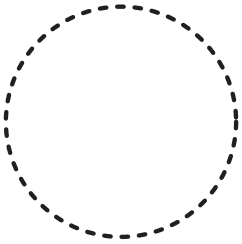
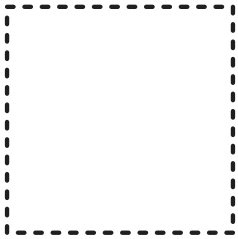
Shape tracing and matching

Follow the dotted paths with a finger first. Then try a pencil; stop for a break whenever needed.

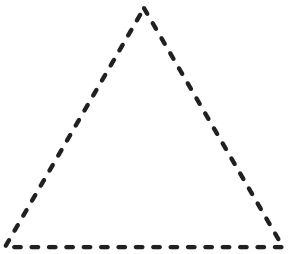
circle



square

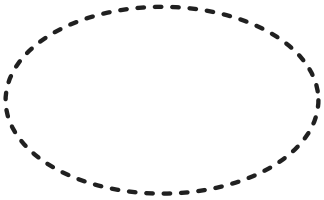


triangle

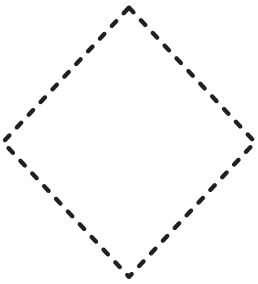


rectangle

oval



diamond



Shape tracing and matching — answers

For the grown-up. Accept familiar alternative names where appropriate.

Grown-up note: Match each outline to its own name: circle, square, triangle, rectangle, oval or diamond. The diamond is a rhombus; turning any of these shapes does not change what it is.
