Number rods 1–10

Each square is one unit. Adult prepares pieces. Print at actual size.

Number strip — keep the units together

Number rods and strips 1–10

Grown-up guidance · keep separate from the activity

Grown-up answers

Rod n contains exactly n squares for each n from 1 to 10. A 2 rod joined to a 3 rod has the same length as a 5 rod.

Support

An adult supervises cutting. These are original equal-unit paper rods, not a claim of alignment with a commercial manipulative system.
